

# Seamless Low Temperature Structural Steel Pipes With Beveled Thread Couplings

### **Basic Information**

- Place of Origin:
- Brand Name:
- Certification: CE & ISO

hebei, china

BaoYang

- Model Number: Seamless Steel Pipe
   Minimum Order 1
- Quantity:
- Price: Negotiable
- Packaging Details: Wooden packing
- Delivery Time: 7~15 working days
- Payment Terms: L/C, D/P, T/T

## Product Specification

• Ends:	Beveled Thread+Couplings
Name:	Seamless Steel Pipe
Standard:	API, ASTM, JIS, API 5CT, API 5L, ASTM A106-2006, ASTM A53-2
• Usage:	Pipeline Transport, Oil/Gas Drilling, Machinery Industry
Material:	Carbon Steel Alloy Steel
Process:	Hot Rolled Cold Rolled Cold Drawn
Wall Thickness:	1-20mm (0.04 Inch - 0.78 Inch)
Processing Service:	Bending, Punching, Cutting
Highlight:	Seamless Structural Steel Pipes, Low Temperature Structural Steel Pipes, Beveled Thread Couplings Structural Steel

Pipes

#### **Product Description:**

The wall thickness of our seamless steel pipe ranges from 1mm to 20mm (0.04 Inch - 0.78 Inch), making it suitable for different types of projects and industrial applications. The technology used in the production process includes hot rolled and cold rolled methods, which ensure a smooth and uniform surface finish. This makes our seamless steel pipe ideal for bending, punching, and cutting services, providing flexibility and convenience to our customers.

Our seamless steel pipe is made of high-quality materials, including carbon steel and alloy steel. These materials are carefully selected to ensure durability, strength, and resistance to corrosion and rust. The carbon steel material used in our seamless steel pipe is specially designed to withstand high pressure and high temperature conditions, making it ideal for use in high-pressure boiler steel pipes. Our seamless steel pipe is also suitable for use in pipeline steel pipes, where it can be used to transport oil, gas, and other fluids over long distances. The smooth and uniform surface finish of our seamless steel pipe helps to reduce friction and increase the efficiency of fluid transfer, making it an excellent choice for pipeline applications.

Additionally, our seamless steel pipe is an alloy seamless steel pipe, which means it contains other elements such as chromium, nickel, and molybdenum. These elements help to improve the strength, toughness, and corrosion resistance of the steel, making it suitable for use in various industrial applications.

#### Features:

Product Name: Seamless Steel Pipe

Processing Service: Bending, Punching, Cutting Material: Carbon Steel, Alloy Steel Process: Hot Rolled, Cold Rolled, Cold Drawn Technology: Hot Rolled, Cold Rolled

Standard: API, ASTM, JIS, API 5CT, API 5L, ASTM A106-2006, ASTM A53-2

Used for: High Pressure Boiler Steel Pipe, Structural Steel Pipes, Mechanical and Structural Steel Pipes

#### **Technical Parameters:**

Attribute	Value
Material	Carbon Steel, Alloy Steel
Name	Seamless Steel Pipe
Ends	Beveled, Thread+Couplings
Technology	Hot Rolled, Cold Rolled, Cold Drawn
Wall Thickness	1-20mm (0.04 Inch - 0.78 Inch)
Usage	Pipeline Transport, Oil/Gas Drilling, Machinery Industry
Length	6M, 12M or According to Customer Requirements
Processing Service	Bending, Punching, Cutting
Standard	API, ASTM, JIS, API 5CT, API 5L, ASTM A106-2006, ASTM A53-2
Process	Hot Rolled, Cold Rolled, Cold Drawn

This Seamless Steel Pipe product can be used for Pipeline Transport, Oil/Gas Drilling, and Machinery Industry. It is available in Carbon Steel and Alloy Steel materials and can be processed through Bending, Punching, and Cutting. The wall thickness is between 1-20mm (0.04 Inch - 0.78 Inch) and the length is 6M, 12M, or according to customer requirements. The ends can be Beveled or Thread+Couplings. This product meets API, ASTM, and JIS standards including API 5CT and API 5L. The manufacturing process can be Hot Rolled, Cold Rolled, or Cold Drawn. This Seamless Steel Pipe is suitable for Pipeline Steel Pipe, Low Temperature Steel Pipe, and Alloy Seamless Steel Pipe applications.

#### **Applications:**

The seamless steel pipe is also a popular choice in the machinery industry, where it is used in the manufacturing of equipment and machinery components. Its superior processing service, which includes bending, punching, and cutting, makes it a versatile product that can be customized to meet specific needs and requirements.

The seamless steel pipe for fluid transportation is a popular product that is used to transport liquids and gases. Its ability to handle highpressure and high-temperature applications makes it a preferred choice for many industries, including the oil and gas industry, chemical industry, and water transportation industry.

Another popular variant of BaoYang Seamless Steel Pipe is the alloy seamless steel pipe, which is made from a combination of different metals to enhance its strength and durability. The alloy seamless steel pipe is a popular choice in industries such as aerospace, petrochemicals, and power generation, where the product is required to withstand extreme conditions and heavy loads.

The length of the seamless steel pipe is available in 6M, 12M, or can be customized according to customer requirements. The wall thickness ranges between 1-20mm (0.04 Inch - 0.78 Inch), which makes it suitable for a wide range of applications.

#### Support and Services:

- Providing information on product specifications and capabilities
- Assisting with product selection and ordering
- Offering technical guidance on installation, maintenance, and troubleshooting
- Conducting product testing and analysis
  Developing customized solutions to meet specific customer needs - Providing training and education on product usage and safety

### **Packing and Shipping:**

Product Packaging: Wrapped in plastic sheets Secured with steel straps Marked with product specifications Shipping: Shipped via truck or rail Stacked and secured on pallets Loaded with forklifts or cranes Delivered to customer's specified location
