

Hot Rolled Ms Carbon Steel Seamless Steel Pipe For Structure Oil And Gas

Basic Information

Place of Origin: hebei, china
Brand Name: BaoYang
Certification: CE & ISO

Model Number: Seamless Steel Pipe

 Minimum Order Quantity:

• Price: Negotiable

Packaging Details: Wooden packing
 Delivery Time: 7~15 working days
 Payment Terms: L/C, D/A, D/P, T/T

Product Specification

• Wall Thickness:

Technology: Hot Rolled Cold Rolled

Material: Carbon Steel Alloy Steel

Ends: Beveled Thread+Couplings
 Processing Service: Bending, Punching, Cutting

• Standard: API, ASTM, JIS, API 5CT, API 5L, ASTM

A106-2006, ASTM A53-2

1-20mm (0.04 Inch - 0.78 Inch)

Name: Seamless Steel Pipe

• Usage: Pipeline Transport, Oil/Gas Drilling,

Machinery Industry

Highlight: Ms Carbon Steel Seamless Steel Pipe,

Oil And Gas Seamless Steel Pipe, Structure Seamless Steel Pipe

Product Description:

The Seamless Steel Pipe is available in different wall thicknesses ranging from 1-20mm (0.04 Inch - 0.78 Inch), making it suitable for various applications. The length of the pipe can be customized according to customer requirements. It is available in 6M and 12M lengths, making it ideal for use in long pipelines that require continuous flow.

The Seamless Steel Pipe is manufactured using different technologies such as hot-rolled, cold-rolled, and cold-drawn. The hot-rolled technology involves heating the steel above its recrystallization temperature and then rolling it into a shape. This process results in a rough surface finish that is suitable for applications where appearance is not critical. The cold-rolled technology involves rolling the steel at room temperature, which results in a smooth surface finish suitable for applications that require a polished look. The cold-drawn technology involves pulling the steel through a die, resulting in a seamless and precise finish.

The Seamless Steel Pipe is available in different materials such as carbon steel, alloy steel, and stainless steel. Carbon Steel Seamless Pipe is the most commonly used material in the manufacturing of the Seamless Steel Pipe. It is a cost-effective material that is widely used in various industrial applications. Alloy Seamless Steel Pipe is also popular due to its high strength, corrosion resistance, and durability. It is commonly used in the transportation of corrosive fluids. Stainless Steel Seamless Pipe is another popular material due to its high corrosion resistance and aesthetic appeal. It is commonly used in applications that require a polished finish.

The Seamless Steel Pipe is widely used in various industries such as oil and gas, petrochemical, power generation, and manufacturing. It is commonly used in the transportation of fluids such as water, oil, and gas. It is also used in the construction of pipelines, boilers, heat exchangers, and other equipment that require high strength and durability. The pipe is also suitable for use in high-temperature and high-pressure applications.

In conclusion, the Seamless Steel Pipe is a versatile and durable product that is suitable for various industrial and commercial applications. It is available in different materials, wall thicknesses, and lengths, making it suitable for different applications. The pipe is seamless, which makes it stronger and more durable than welded pipes. Whether you need a Carbon Steel Seamless Pipe, Alloy Seamless Steel Pipe, or Stainless Steel Seamless Pipe, the Seamless Steel Pipe is the perfect solution for your fluid transportation needs

Features:

Product Name: Seamless Steel Pipe

Processing Service: Bending, Punching, Cutting Wall Thickness: 1-20mm (0.04 Inch - 0.78 Inch)

Standard: API, ASTM, JIS, API 5CT, API 5L, ASTM A106-2006, ASTM A53-2

Name: Seamless Steel Pipe Material: Carbon Steel Alloy Steel

Features:

Oil and Gas Steel Pipes Low Temperature Steel Pipe Structural Steel Pipes

Technical Parameters:

Technical Parameter	Value
Standard	API, ASTM, JIS, API 5CT, API 5L, ASTM A106-2006, ASTM A53-2
Processing Service	Bending, Punching, Cutting
Wall Thickness	1-20mm (0.04 Inch - 0.78 Inch)
Usage	Pipeline Transport, Oil/Gas Drilling, Machinery Industry
Name	Seamless Steel Pipe
Length	6M 12M OR According To Customer Requirements
Technology	Hot Rolled Cold Rolled
Process	Hot Rolled Cold Rolled Cold Drawn
Ends	Beveled Thread+Couplings
Material	Carbon Steel Alloy Steel

This seamless steel pipe is suitable for a variety of applications including oil and gas steel pipes, structural steel pipes, and alloy seamless steel pipe.

Applications:

BaoYang Seamless Steel Pipe is a versatile product that can be used in various applications. With its high-quality material, advanced technology, and excellent performance, it is suitable for different scenarios and occasions.

One of the primary applications of BaoYang Seamless Steel Pipe is in Pipeline Transport. Its seamless structure, high strength, and durability make it a reliable choice for transmitting fluids, gases, and other materials over long distances. It is widely used in the oil and gas industry for transporting crude oil, natural gas, and petroleum products.

Another important application of BaoYang Seamless Steel Pipe is in Oil/Gas Drilling. Its excellent resistance to high temperature, pressure, and corrosion makes it an ideal choice for drilling operations in harsh environments. It can withstand the extreme conditions of oil and gas wells and provide a smooth and efficient flow of drilling fluids.

BaoYang Seamless Steel Pipe is also widely used in the Machinery Industry. Its high precision, smooth surface, and excellent mechanical properties make it suitable for manufacturing various types of equipment and machinery. It is commonly used in the production of hydraulic cylinders, automotive parts, and other mechanical components.

The length of BaoYang Seamless Steel Pipe can be customized according to customer requirements. It is available in standard lengths of 6m and 12m, which are suitable for most applications. However, if specific lengths are needed, they can be customized to meet customer demands

BaoYang Seamless Steel Pipe is available in both Hot Rolled and Cold Rolled technology. The hot-rolled pipes have a rough surface and are suitable for heavy-duty applications, while the cold-rolled pipes have a smooth surface and are ideal for precision applications. BaoYang Seamless Steel Pipe is made of high-quality Carbon Steel and Alloy Steel. It has excellent strength, toughness, and corrosion resistance, making it suitable for various industrial applications. Whether it is for fluid transportation, oil/gas drilling, or machinery industry, BaoYang Seamless Steel Pipe is a reliable and efficient choice for your needs.

In conclusion, BaoYang Seamless Steel Pipe is a versatile product that can be used in multiple scenarios and occasions. Its superior quality, advanced technology, and outstanding performance make it an ideal choice for Pipeline Transport, Oil/Gas Drilling, and Machinery Industry. Whether you need seamless steel pipe for fluid transportation, pipeline steel pipe, or other purposes, BaoYang Seamless Steel Pipe can meet your requirements and exceed your expectations.

Support and Services:

Our Seamless Steel Pipe product comes with top-notch technical support and services to ensure that our customers have a seamless experience. Our team of experts is always available to provide technical assistance and guidance in case of any issues with the product. We also offer a range of services such as installation, maintenance, and repair to ensure that our customers get the maximum benefit from our Seamless Steel Pipe product. Our technicians are highly trained and experienced in handling any installation or repair work and ensure that the job is done efficiently and effectively.

Additionally, we also offer training and support services to our customers to help them understand the product better and make the most of its features and capabilities. Our training programs are tailored to meet the specific requirements of our customers, and we ensure that they are equipped with the knowledge and skills to use the product effectively.

Packing and Shipping:

Product Packaging:

Seamless steel pipes are packaged in bundles with steel strips and plastic caps on both ends.

The bundles are then wrapped with waterproof cloth and strapped with steel strips.

The packaging is sturdy and suitable for transportation by land, sea, or air.

Shipping:

Shipping of seamless steel pipes is done via containers or bulk cargo vessels.

For container shipping, the pipes are loaded into 20ft or 40ft containers after packaging.

Bulk cargo vessels are used for larger quantities of pipes.

Shipping documents such as bill of lading and packing list are provided to the customer.
