

Cold Rolled Process ASTM A53 Standard Seamless Steel Pipe

Our Product Introduction

for more products please visit us on pipe-seamless.com

Basic Information

- Place of Origin: hebei, china
- Brand Name: BaoYang
- Certification: CE & ISO
- Model Number: Seamless Steel Pipe
- Minimum Order Quantity: 1
- Price: Negotiable
- Packaging Details: Wooden packing
- Delivery Time: 7~15 working days
- Payment Terms: L/C, D/A, D/P, T/T
- Supply Ability: 500000Pcs/Per Month

Product Specification

- Material: Carbon Steel Alloy Steel
- Usage: Pipeline Transport, Oil/Gas Drilling, Machinery Industry
- Wall Thickness: 1-20mm (0.04 Inch - 0.78 Inch)
- Length: 6M 12M OR According To Customer Requirements
- Ends: Beveled Thread+Couplings
- Technology: Hot Rolled Cold Rolled
- Processing Service: Bending, Punching, Cutting
- Standard: API, ASTM, JIS, API 5CT, API 5L, ASTM A106-2006, ASTM A53-2
- Highlight: **Standard Seamless Steel Pipe, Cold Rolled Seamless Steel Pipe, ASTM A53 Seamless Steel Pipe**

Product Description:

A Carbon Steel Seamless Pipe is a type of Seamless Steel Pipe that is commonly used in various industries for fluid transportation. Known for its durability and high-performance capabilities, this Seamless Steel Pipe is designed to withstand high pressure and temperature conditions, making it suitable for critical applications in pipeline transport, oil/gas drilling, and the machinery industry. Manufactured through a rigorous process that involves hot rolling, cold rolling, or cold drawing, the Carbon Steel Seamless Pipe is crafted with precision and expertise to ensure seamless performance and reliability. The choice of process - whether hot rolled, cold rolled, or cold drawn - influences the structural integrity and mechanical properties of the steel pipe, making it suitable for different applications. Utilizing advanced technology such as hot rolling and cold rolling, the Seamless Steel Pipe is engineered to meet the highest quality standards and specifications. The hot rolling process involves heating the steel billet to high temperatures and passing it through rollers to achieve the desired shape and dimensions. On the other hand, cold rolling is a process that involves rolling the steel at room temperature to improve its surface finish and dimensional accuracy. With a wall thickness ranging from 1mm to 20mm (0.04 inch to 0.78 inch), the Carbon Steel Seamless Pipe offers a wide range of options to suit specific project requirements. The varying wall thickness allows for customization based on the pressure and temperature conditions of the fluid being transported, ensuring optimal performance and safety. Constructed from high-quality materials such as carbon steel and alloy steel, the Seamless Steel Pipe is engineered to deliver exceptional strength and corrosion resistance. Carbon steel offers excellent weldability and machinability, making it a popular choice for applications requiring high strength and durability. Meanwhile, alloy steel provides enhanced mechanical properties and resistance to wear and tear, making it ideal for demanding industrial environments. In conclusion, the Carbon Steel Seamless Pipe is a reliable and efficient solution for fluid transportation in pipeline transport, oil/gas drilling, and the machinery industry. With its robust construction, precise manufacturing process, and advanced technology, this Seamless Steel Pipe is designed to meet the toughest challenges and deliver superior performance in critical applications.

Features:

- Product Name: Seamless Steel Pipe
- Length: 6M 12M OR According To Customer Requirements
- Standard: API, ASTM, JIS, API 5CT, API 5L, ASTM A106-2006, ASTM A53-2
- Wall Thickness: 1-20mm (0.04 Inch - 0.78 Inch)
- Material: Carbon Steel Alloy Steel
- Technology: Hot Rolled Cold Rolled

Technical Parameters:

Name	Carbon Steel Seamless Pipe
Length	6M 12M OR According To Customer Requirements
Ends	Beveled Thread+Couplings
Process	Hot Rolled Cold Rolled Cold Drawn
Material	Carbon Steel Alloy Steel
Technology	Hot Rolled Cold Rolled
Wall Thickness	1-20mm (0.04 Inch - 0.78 Inch)
Standard	API, ASTM, JIS, API 5CT, API 5L, ASTM A106-2006, ASTM A53-2
Usage	Pipeline Transport, Oil/Gas Drilling, Machinery Industry
Processing Service	Bending, Punching, Cutting

Applications:

BaoYang Seamless Steel Pipe is a top-quality product originating from Hebei, China. With a wall thickness ranging from 1-20mm (0.04 Inch - 0.78 Inch), this seamless steel pipe is a versatile solution for various applications across different industries. One of the key application scenarios for this product is in Low Temperature Steel Pipe systems. The seamless design ensures efficient fluid transportation even in extreme temperature conditions, making it ideal for use in cold environments where traditional welded pipes may be prone to cracking. Another important use case for the BaoYang Seamless Steel Pipe is in Pipeline Transport. The beveled thread and couplings at the ends of the pipe ensure a secure and leak-proof connection, making it a reliable choice for long-distance pipeline systems in industries such as oil and gas. Furthermore, this seamless steel pipe is well-suited for Oil/Gas Drilling operations. Its hot rolled and cold rolled technology, combined with the hot rolled, cold rolled, cold drawn process, results in a durable and high-performance pipe that can withstand the demanding conditions of drilling activities. The BaoYang Seamless Steel Pipe also finds extensive applications in the Machinery Industry. Its seamless construction and precise manufacturing make it an excellent choice for various machinery components, where strength, reliability, and precision are paramount. In summary, the BaoYang Seamless Steel Pipe is a versatile product with a wide range of applications, including but not limited to Low Temperature Steel Pipe systems, Seamless Steel Pipe for Fluid Transportation, Pipeline Steel Pipe for reliable transport, and Machinery

Industry components.

Customization:

Product Customization Services for the BaoYang Seamless Steel Pipe: -----
Brand Name: BaoYang
Model Number: Seamless Steel Pipe
Place of Origin: Hebei, China
Processing Service: Bending, Punching, Cutting
Standard: API, ASTM, JIS, API 5CT, API 5L, ASTM A106-2006, ASTM A53-2
Name: Seamless Steel Pipe
Ends: Beveled Thread+Couplings
Technology: Hot Rolled Cold Rolled
Keywords: Low Temperature Steel Pipe, Carbon Steel Seamless Pipe, Oil and Gas Steel Pipes

Support and Services:

Our Product Technical Support and Services for Seamless Steel Pipe include: -----
- Expert assistance with product selection and specifications
- Guidance on installation and usage of seamless steel pipes
- Troubleshooting and problem-solving support
- Regular maintenance recommendations and best practices
- Training programs for proper handling and care of seamless steel pipes
- Access to online resources, technical documentation, and FAQs for seamless steel pipe products
