

ASTM Standard Steel Seamless Tube Pipe Hot Rolled Process

Our Product Introduction

for more products please visit us on pipe-seamless.com

Basic Information

- Place of Origin: hebei, china
- Brand Name: BaoYang
- Certification: CE & ISO
- Model Number: Seamless Steel Pipe
- Minimum Order Quantity: 1
- Price: Negotiable
- Packaging Details: Wooden packing
- Delivery Time: 7~15 working days
- Payment Terms: L/C, D/A, D/P, T/T
- Supply Ability: 500000Pcs/Per Month

Product Specification

- Length: 6M 12M OR According To Customer Requirements
- Standard: API, ASTM, JIS, API 5CT, API 5L, ASTM A106-2006, ASTM A53-2
- Wall Thickness: 1-20mm (0.04 Inch - 0.78 Inch)
- Technology: Hot Rolled Cold Rolled
- Material: Carbon Steel Alloy Steel
- Processing Service: Bending, Punching, Cutting
- Process: Hot Rolled Cold Rolled Cold Drawn
- Name: Seamless Steel Pipe
- Highlight: **ASTM Standard Seamless Steel Pipe ,
Hot Rolled Seamless Steel Pipe ,
Hot Rolled Steel Pipe**

Product Description

Product Description:

A Seamless Steel Pipe is a type of pipe that is produced without a welded seam. This seamless construction provides a smooth and continuous surface along the length of the pipe, making it ideal for various applications in industries such as oil and gas, structural engineering, and more.

The Seamless Steel Pipe is manufactured using different processes such as Hot Rolled, Cold Rolled, and Cold Drawn techniques. Each process offers specific advantages in terms of strength, durability, and precision. Hot Rolled Seamless Steel Pipes are produced at high temperatures, resulting in improved mechanical properties. Cold Rolled Seamless Steel Pipes undergo a process of rolling at room temperature, offering enhanced surface finish and dimensional accuracy. Cold Drawn Seamless Steel Pipes are created by pulling the pipe through a die to achieve precise dimensions and a smooth surface.

These Seamless Steel Pipes are constructed from high-quality materials including Carbon Steel and Alloy Steel. Carbon Steel Seamless Pipes are known for their strength and versatility, making them suitable for a wide range of applications. Alloy Steel Seamless Pipes offer enhanced corrosion resistance and high tensile strength, making them ideal for demanding environments.

The Seamless Steel Pipe is manufactured using advanced technologies such as Hot Rolled and Cold Rolled methods. Hot Rolled technology involves heating the steel billet to high temperatures and then rolling it to form the seamless pipe. Cold Rolled technology, on the other hand, involves the process of shaping the steel at room temperature to achieve desired dimensions and properties.

These Seamless Steel Pipes adhere to industry standards such as API, ASTM, and JIS, ensuring high quality and performance.

Standards such as API 5CT, API 5L, ASTM A106-2006, and ASTM A53-2 are commonly met by Seamless Steel Pipes, guaranteeing reliability and durability in various applications.

Seamless Steel Pipes are widely used in the oil and gas industry for transporting fluids under high pressure and temperature conditions.

Their seamless construction eliminates the risk of leakage and enhances the overall efficiency of the pipeline system. Additionally, Seamless Steel Pipes find applications in structural engineering, where their high strength and reliability make them suitable for construction projects.

Overall, the Seamless Steel Pipe is a versatile and high-performance product that meets the demands of various industries such as oil and gas, structural engineering, and more. With its seamless construction, quality materials, advanced technologies, and adherence to industry standards, the Seamless Steel Pipe is a reliable choice for critical applications.

Features:

Product Name: Seamless Steel Pipe

Length: 6M 12M OR According To Customer Requirements

Standard: API, ASTM, JIS, API 5CT, API 5L, ASTM A106-2006, ASTM A53-2

Ends: Beveled Thread+Couplings

Usage: Pipeline Transport, Oil/Gas Drilling, Machinery Industry

Technology: Hot Rolled Cold Rolled

Technical Parameters:

Standard	API, ASTM, JIS, API 5CT, API 5L, ASTM A106-2006, ASTM A53-2
Material	Carbon Steel, Alloy Steel
Processing Service	Bending, Punching, Cutting
Usage	Pipeline Transport, Oil/Gas Drilling, Machinery Industry
Technology	Hot Rolled, Cold Rolled
Process	Hot Rolled, Cold Rolled, Cold Drawn
Length	6M, 12M OR According To Customer Requirements
Name	Seamless Steel Pipe
Ends	Beveled Thread+Couplings
Wall Thickness	1-20mm (0.04 Inch - 0.78 Inch)

Applications:

BaoYang Seamless Steel Pipe is a top-quality product designed for a variety of industrial applications. With its exceptional attributes, this seamless steel pipe is perfect for use in a wide range of scenarios.

One of the key product application occasions for the BaoYang Seamless Steel Pipe is in the oil and gas industry. The pipe's high-quality material, carbon steel alloy steel, and excellent wall thickness make it ideal for use in pipeline transport and oil/gas drilling operations. Its durability and reliability ensure efficient and safe transportation of oil and gas, meeting the industry's stringent requirements.

Another important application scenario for the Seamless Steel Pipe is in high-pressure boiler systems. The pipe's ability to withstand high pressures, coupled with its precise ends (beveled thread+couplings), makes it a perfect choice for use in high-pressure boiler applications. Whether it's in power plants or industrial settings, this seamless steel pipe delivers outstanding performance under demanding conditions.

Additionally, the BaoYang Seamless Steel Pipe is well-suited for use in the machinery industry. Its versatility and strength make it an excellent choice for various machinery applications. The pipe's long length options (6M, 12M, or according to customer requirements)

provide flexibility for different machinery setups, while its robust construction ensures reliable performance over time. For scenarios requiring low-temperature steel pipes, the BaoYang Seamless Steel Pipe is a dependable choice. Its high-quality material and precise manufacturing ensure that it can withstand low temperatures without compromising performance. This makes it suitable for use in applications where temperature fluctuations are a concern. Overall, the BaoYang Seamless Steel Pipe is a versatile and reliable product that caters to a wide range of applications in industries such as oil and gas, machinery, and high-pressure boiler systems. Its exceptional attributes, including the brand name, model number, place of origin, and specific dimensions, make it a top choice for various industrial needs.

Customization:

Brand Name: BaoYang
Model Number: Seamless Steel Pipe
Place of Origin: hebei, china
Ends: Beveled Thread+Couplings
Technology: Hot Rolled Cold Rolled
Length: 6M 12M OR According To Customer Requirements
Processing Service: Bending, Punching, Cutting
Name: Seamless Steel Pipe

Support and Services:

Our Seamless Steel Pipe product comes with comprehensive Product Technical Support and Services to ensure customer satisfaction and optimal performance. Our team of experts is available to provide technical guidance, answer product-related inquiries, and offer assistance with installation and maintenance. We are committed to delivering top-notch support services to address any issues or concerns that may arise, helping our customers maximize the benefits of our Seamless Steel Pipe product.
